### PART III: REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance: The claims are allowable over the prior art of record because the prior art of record does not show or teach a machine (which is disclosed as being a vending machine) which uses credit cards for operating the machine, the machine diminishing the credit card value by the amount of payment required, wherein the aggregate credit card data in the machine can be downloaded to a card, and such a card can be operable to inhibit the downloading of that data, thus preventing the downloading of data to cards that would otherwise be authorized to download such data.

The closest prior art is the patent to Newkirk et al, which was used to initially reject the claims, and the EPO patent to Pitney Bowes, Inc., which discloses the transfer of data between supervisory, master and user cards, but not to and from the machine maintained record.

The prior art made of record and not relied upon is considered pertinent to the applicant's disclosure. **Biometrics, temp IDs, smart cards stress personalization** discusses the variety of uses for smart cards.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Rice at (703) 308-3495. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist at (703) 308-1113.
